Test cases

Small disclaimer:

I wasn't sure about the first steps in test cases no. 2, 3 and 4 as there is a possibility to directly go into `/rent/id` page thus skipping part of steps during automation. However, as I decided to write a bug #17 in my bug report that this shouldn't be available (or at least blocked for already rented cars), in those test cases I decided to keep those steps (later it can be rewritten if the direct navigation to rent page is intended). In test case no. 1 I believe those steps are important as the information is validated later on.

Test Case ID	1	Expected Results
Test Case Description	Check Car Details with Provided Date	
Test Steps	1. Navigate to home page http://qalab.pl.tivixlabs.com. 2. Select 'Poland' in 'Country' dropdown. 3. Select 'Wroclaw' in 'City' dropdown. 4. Type 'Toyota RAV4' in 'Model' input. 5. Select 'Pick-up date' as *pickUpDate*. 6. Select 'Drop-off date' as *dropOffDate*. 7. Click 'Search' button.	Displayed search results.
	8. Click 'Rent' next to any listed result.	Displayed car details and selected date are the same as on search results page.
Test Data	*pickUpDate = 10.10.2022* *dropOffDate = 17.10.2022*	

Test Case ID	2	Expected Results
Test Case Description	Check Name and Last Name Validation	
Test Steps	1. Navigate to page http://qalab.pl.tivixlabs.com/?country=3&city=4&model=&pickup=2022-10-10&dropoff=2022-10-17.	Displayed search results.

	2. Click 'Rent' next to first listed result. 3. Click 'Rent!' button.	Navigated to rent form.

	4. Leave the value of 'Name' input empty.
	5. Leave the value of 'Last name' input empty.
	6. Type the value '1' in 'Card number' input.
	7. Type the value 'test@test.com' in 'Email' input.
	8. Click 'Rent' button.
		Displayed alerts:
		`'Name is required'`
		`'Last name is required'`

	9. Set the value of 'Name' input with _wrongTestValue_.
	10. Set the value of 'Last name' input with _wrongTestValue_.
	11. Type the value '1' in 'Card number' input.
	12. Type the value 'test@test.com' in 'Email' input.
	13. Click 'Rent' button.
		Displayed alerts:
		`'Name value is too long'`
		`'Last name value is too long'`

	14. Set the value of 'Name' input with _correctTestValue_. 15. Set the value of 'Last name' input with _correctTestValue_. 16. Type the value '1' in 'Card number' input. 17. Type the value 'test@test.com' in 'Email' input. 18. Click 'Rent' button.	No alert for correct values.
Test Data	_wrongTestValue =_ _testtesttesttesttesttesttestesttesttesttesttesttest_ _correctTestValue = test_	

Test Case ID	3	Expected Results
Test Case Description	Check Card Number Validation	
Test Steps	1. Navigate to page http://qalab.pl.tivixlabs.com/?country=3&city=4&model=&pickup=2022-10-10&dropoff=2022-10-17.	Displayed search results.
	2. Click 'Rent' next to first listed result. 3. Click 'Rent!' button.	Navigated to rent form.
	4. Type the value 'test' in 'Name' input. 5. Type the value 'test' in 'Last name' input. 6. Leave the value of 'Card number' input empty. 7. Type the value 'test@test.com' in 'Email' input. 8. Click 'Rent' button.	Displayed alert: `'Card number is required'`

	9. Type the value 'test' in 'Name' input. 10. Type the value 'test' in 'Last name' input. 11. Set the value of 'Card number' input with _wrongTestValueLength_. 12. Type the value 'test@test.com' in 'Email' input. 13. Click 'Rent' button.	Displayed alerts: 'Card number value is too long'
	14. Type the value 'test' in 'Name' input. 15. Type the value 'test' in 'Last name' input. 16. Set the value of 'Credit number' input with _wrongTestValueCharacters._ 17. Type the value 'test@test.com' in 'Email' input. 18. Click 'Rent' button.	Displayed alerts: 'Card number contains wrong chars'
	19. Type the value 'test' in 'Name' input. 20. Type the value 'test' in 'Last name' input. 21. Set the value of 'Card number' input with _correctTestValue_. 22. Type the value 'test@test.com' in 'Email' input. 23. Click 'Rent' button.	No alert for correct values.
Test Data	_wrongTestValueLength = 1111111111111111111111111_ _wrongTestValueCharacters = -22_ _correctTestValue = 1111_	

Additional test case, just to cover all inputs in form validation:

Test Case ID	4	Expected Results
Test Case Description	Check Email Validation	
Test Steps	1. Navigate to page http://qalab.pl.tivixlabs.com/?country=3&city=4&model=&pickup=2022-10-10&dropoff=2022-10-17.	Displayed search results.
	2. Click 'Rent' next to any listed result. 3. Click 'Rent!' button.	Navigated to rent form.
	4. Type the value 'test' in 'Name' input. 5. Type the value 'test' in 'Last name' input. 6. Type the value '1111' in 'Card number' input. 7. Leave the value of 'Email' input empty. 8. Click 'Rent' button.	Displayed alert: 'Email is required'
	1. Type the value 'test' in 'Name' input. 2. Type the value 'test' in 'Last name' input. 3. Type the value '1111' in 'Card number' input. 4. Set the value of 'Email' input with _wrongTestValueLength_. 5. Click 'Rent' button.	Displayed alert: 'Email value is too long'

	6. Type the value 'test' in 'Name' input. 7. Type the value 'test' in 'Last name' input. 8. Type the value '1111' in 'Card number' input. 9. Set the value of 'Email' input with _wrongTestValueCharacters_. 10. Click 'Rent' button.	Displayed alerts: 'Please provide valid email'
	1. Type the value 'test' in 'Name' input. 2. Type the value 'test' in 'Last name' input. 3. Type the value '1111' in 'Card number' input. 4. Set the value of 'Email' input with _correctTestValue_. 5. Click 'Rent' button.	No alert for correct values.
Test Data	_wrongTestValueLength =_ _testtesttesttesttesttesttestesttesttesttesttestes@_ _wrongTestValueCharacters = test_ _correctTestValue = test@test.com_
